### Brilliant

The Scintillant® Surgical Light provides bright, shadowless light—giving you focused illumination where you need it most—in the surgical field.

### Agile

The Scintillant® Surgical Light provides a new level of agility for procedures that require lighting of even the deepest surgical sites without the hassle of cords and wires.

### Flexible

Scintillant® Surgical Light comes in 3 configurations that compliment your current tools and has a flexible wand for a customized lighting solution.

# Benefits

## SUCTION

A handheld surgical light assembled to a tonsil style suction tip designed to combine efficient fluid aspiration with bright illumination.

## ZIP STRAP

A handheld surgical light with straps for attachment. Many opportunities exist to combine bright light with your existing Operating Room instruments.

## RETRACTOR

A handheld surgical light assembled to a low profile flat retractor that combines moderate blunt retraction of tissue with bright illumination.

### Powerful and Versatile

Scintillant® Surgical Light is a sterile, single-use, focused illumination device. This battery powered light can be used with the supplied accessories and does not require a bulky external light source, thus eliminating the need for clumsy cords and awkward headgear. The device can also be used independently as a hand-held light source.

### Features

- Focused, high-intensity white LED
- Flexible wand for precise illumination
- Cordless, battery powered LED tip
- 100 Minutes of bright white light
- Ergonomic rubberized grip

**3 styles of sterile, single use, battery powered lights available**

**Scintillant®**  
surgical light

### Suction Attachment

- Evacuates fluid
- Gives moderate retraction
- Easily detaches from suction
- Aspirates and illuminates

### Zip Strap

- Enhance tools in seconds
- Attach Breisky, Deaver, and Heaney style retractors
- Versatile and customizable

### Retractor Attachment

- Retract tissue and illuminate
- Easily detach from retractor
- Non-malleable
